In the process of occurred reconsideration of sociocultural reality, the characteristic of all spheres of life underwent considerable changes. They didn't disregard also humanitarian science. Former methods of the analysis were unsuitable. The gender turn opened new theoretic-methodological opportunities of research. In this regard, philosophical and culturological aspects of gender which gradually loses the primary understanding as social sex, being filled with the diverse cultural contents are analyzed. The main attention is directed on studying of cultural and philosophical components. It allows passing without difficulties from sociology to philosophical and culturological sphere.

Keywords: *culture, gender approach, humanity, gender, gender relations.*
